WHAT WE DO ?

An abstract geometric pattern on the left side of the slide. It consists of several overlapping circles of different sizes. From various points within these circles, numerous thin, light-gray lines radiate outwards, creating a complex, web-like structure that fills the left half of the image. The lines intersect to form a variety of small, irregular polygons.

*.secure deletion involves
overwriting the file's contents
with random data (or
zeros)multiple times before the
file is actually deleted . this
prevents data recovery tools
from recovering the file's original
contents.*

*after that , the file is deleted
from the file system using
standard file deletion methods*

WIPEFINITY isn't just a file deletion tool ,
it's your personal guardian for digital
security,with WIPEFINITY you can take
control of your data , protect urself from
prying eyes and make data recovery a
thing of thepast !
